

Hello News

Children's Books - Illustrations - Posters - Wallpapers

My 5K wallpapers are here!

I'm excited to announce the release of my personal collection of 5K wallpapers, designed specifically for Mac and desktop computers (also iPad and tablets). Each wallpaper is crafted to bring a burst of colour, inspiration, and high-resolution detail to your screen. Perfect for refreshing your workspace this October.

Doodles in 5K!

Get ready to inject some personality into your daily digital life! I'm thrilled to introduce my collection of high-resolution wallpapers, where fun characters and bright, whimsical doodles take centre stage.

Meticulously crafted in pristine 5K resolution (5120x3200), every detail pops with incredible clarity. Whether you're working on a large iMac, a Windows PC, or browsing on your iPad or tablet, these wallpapers are optimised to look vibrantly sharp on any screen.

Creating these was a genuine delight, and that sense of fun is baked into every design. It's my hope that they bring a smile to your face and a splash of colour to your workspace.
