NEW PRODUCTS AND PROJECTS!

JUNE 2026

DOODLE MATCH

A MATCH 3 MOBILE GAME!

I started this project at the end of February (2026). I wanted to see if it was possible to make a game. The idea of making a match-3 game came from looking at my doodles and playing Puyo Puyo Pop. Puyo Puyo Pop is a combo Tetris-style game, but you have jelly-like blobs instead of blocks/different shapes. I love the art style and thought that would be my inspiration for my match-3 game. The game will have three game modes - Survival Mode, Speed Run, and Chillout Mode.

I am hoping for a July release date(But maybe September looks more likely).

NEW PROJECTS!

WHAT IS DOODLE MATCH?

I started this project at the end of February (2026). I wanted to see if it was possible to make a game using Claude. The idea of making a match-3 game came from looking at my doodles and playing Puyo Puyo Pop. Puyo Puyo Pop is a combo Tetris-style game, but you have jelly-like blobs instead of blocks of different shapes. I love the art style and thought that would be my inspiration for my match-3 game. The game will have three game modes - Survival Mode, Speed Run, and Chillout Mode.

I am hoping for a July release date(But maybe September looks more likely).

WALLPAPER PACK

LOT'S OF MODES!

SPEED RUN MODE:

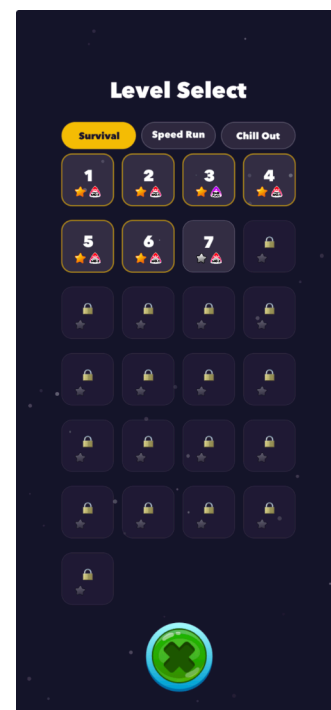

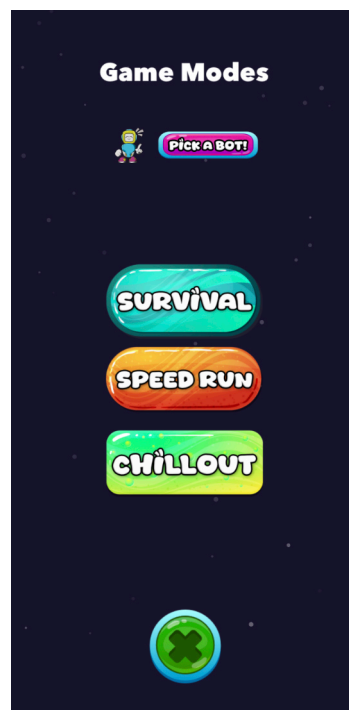

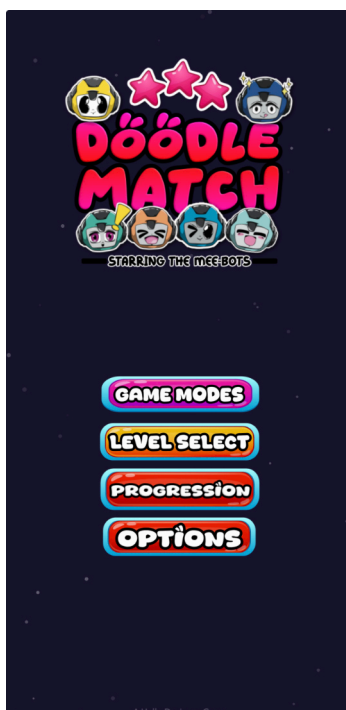

You get a time limit, and you're just matching as fast as possible. The grid gets harder, but the pressure comes from the clock. Combos add bonus seconds. The number of levels is 28. The bigger the combos, the more seconds you get.

SURVIVAL MODE:

You start with a set number of moves, and the game gets harder as you progress through levels. Each level you clear by completing its missions will give you special items to help you along the way. You play until you run out of moves. Bonus moves are awarded for completing missions and hitting combos. In this mode, you have 25 levels to complete.

CHILLOUT MODE:

If you want to play without racing against the clock, or you don't want the stress of not wasting moves, then ChillOut mode is for you. You get the special items in this mode. Also, all the levels from Speed Run and Survival modes.

You can buy some cool Mee-Bots Digital Stickers by tapping the link!

SUPERBOTS!

Super Bots get rid of the same colour bots; they can also create a chain of combos called Super Combo Chain.

A Super Bot is made by linking four of the same colour bots together - four Zap Bots make a Super Bot. It then gets rid of the same colour bots by matching them with another bot of the same colour (four Zaps make a Super Bot, then match Super Zap with another Zap to get rid of all Zaps on the grid).

MEET THE MEE-BOTS!

ACE – Cool, confident, and unstoppable. Ace charges forward with positivity and determination, inspiring everyone to believe in themselves and keep moving ahead.

BLAZE – The life of the party! Always smiling and full of energy, Blaze spreads joy wherever they go. If there's fun to be had, Blaze is already there making it even better.

DOT – The heart of the team. Kind, gentle, and always ready to listen, Dot is the Bot you turn to when you need support or a helping hand. No problem is too big when Dot's around.

PIP – The class clown of the crew! Pip is always cracking jokes and turning even the quietest moments into laughter. If you need cheering up, Pip's got a punchline ready.

ZIP – The ultimate hype Bot! Zip lives for good vibes, big energy, and unforgettable moments. Whether it's a party or a pick-me-up, Zip knows exactly how to lift your spirits.

NOVA – A little mysterious, a little mischievous... but always loyal. Nova might have a sly side, but deep down, they've always got your back when it matters most.

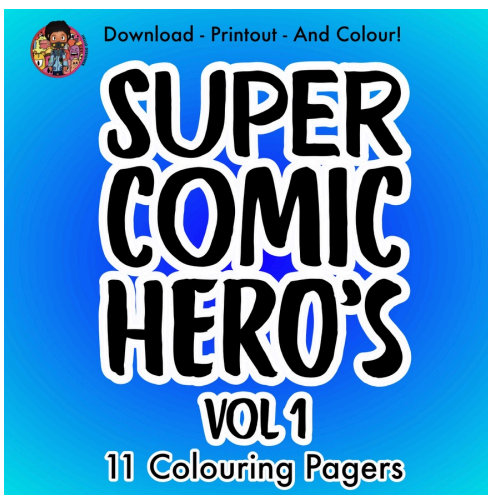

OUT NOW!!
